WE published, about a fortnight ago, sketch of the life of Colonel Mosby, formerly U. S. Consul here, copied from the New York World. In that sketch it was stated the worthy Colonel was dying, and the appreciative remarks on the brave Colonel were ended thus-It is a gallant and a chivalrous spirit that is passing away.' We are sure that every one in Hongkong who remembers Consul Mosby in this Colony will be pleased to learn that the last new. work here in Hongkong also showed his American fever in all its intensity. fearlessness and his hatred of everything like humbug. He did much to clear the U.S. Consulate here from the bad reputation it had earned; and he did much towards raising the standard of honesty and clean handedness in the U.S. Civil Service generally. Hongkong has been blessed with a succession of straightforward U.S. Consuls for many years back—chiefly, we almost think, owing to the forcible action of Colonel Mosby, and the strong despatches he sent to the State Department. Curiously enough, the accident to Colonel Mosby must have happened about the same time as Consul Hunt (U.S. Consul here) was thrown from his horse. For · the two gentlemen well known in. Hongkong-able cavalry leaders-to be injured almost at the same time in a very similar

The Professor prefaced his demonstration with a short address, in which he explained the various modes adopted in the past to administer electricity to the patient. He characterised the old method of giving the patient a shock from a gal-\_me battery as in some cases highly dangerous, and proceeded to explain that by his patented system the electricity passed through himself to his patient, so that all danger was removed. His only surgical instruments were pieces of wool, and he guaranteed to demonstrate that the wool-would be as effective as the surgeon's lancet. The Professor's Chinose interpreter also delivered a short address to the large number of Chinese present. The first patient to be treated was Mr Taufer, who was suffering from blindness and deafness. The patient was scated in a chair with his feet on a mat, which was connected with the electrical appliance. To prove the patient's deafness, the Professor asked him a few questions in a loud voice. He then stated he was to treat Mr Taufer for deafness that night, and he would attend to his eyesight at his consulting rooms. The Professor then commenced the operation by switching on the electric current, and with a small piece of wetted wool formed in the shape of a pencil he transmitted the electric current from himself to his patient. He also made a few passes with his fingers over certain parts of the head and neck. At the close of the operation he intimated that the patient was in a very weak state of Police. health, and in consequence the relectric current he had transmitted to him had VESSELS AT THE DOCKS :- At Koudoonbeen very weak. A few questions were addressed to the patient in a normal tone of voice, which he indicated he had heard by answering correctly. The Professor was applauded for his success in the treatment of the case. The case next treated was for partial deafness and blindness, and here also the Professor appeared to have affected his cure. A patient suffering from intense rheumatism intimated that he had recoived immenso relief under the treatment. The Professor then intimated he would give the audience some amusement. A number of simple electrical tricks were performed on several gentlemen who ascended the platform. The Professor closed the demonetration with the intimation that he was prepared to treat free any absolutely helpless cases to-night if they were brought to the hall at aix o'clock provided

On 19th May deendant put another box in a ricksha and drove away with it.

May he took defendant to the City Hall. He was carrying a parcel, which he took into the City Hall, and he returned without it. On the following day under instructions from defendant he took the box in Court to a house in Duddell Street. George Millward, freight clerk, C.P.R. President Faure will arrive at St. Peters- Company, said at six o'clock on the afternoon of 18th May he sent defendant from the office to the Empress of India, and asked him to get a purser's receipt for the parcel which he took off. He did not return, and on the following morning on asking the first witness where the defendant was he said he was sick and would not be at the office. The following day ha heard the defendant had gone away. He got the keys of the godown from the de-

Two days later. in consequence of information received. he went to the godown and took stock The following notice is issued from the He found articles missing to the total value of about \$15. The whole stock was worth about \$34,000. From what the first witness told him he went to the Police Station and took out a warrant. I met them on their arrival on Wednesday morning, about the 14th or 15th May, and brought them with their baggage to Old Pedder's Wharf. One of the party asked me if I would take care of three boxes for them until their departure. They consisted of one big trunk and two small boxes I kept them in the godown until the 7th May. I then took the big box to the City I took the two small boxes to Stainfield's Hotel, where my friend was staying. The box in court was at the time being used as a dust box. I made use of it t pack a Japanese tea set which got broken on the way down and I took it to Stainfield's Hotel. \_I handed it to the person for whom I had brought it. They unpacked the tea set and asked me to take the box back, but as I was not going to town at the time I told them I would send for it. I forgot to do so and it remained there. The prosecutor sent me with a chityfor a deck chair for the stores. We sent the office for it. On making enquiries at the office I found that this chair, not being the property of the Company or the prosecutor, was sent to his house.
